This villa is designed in a contemporary architectural style, with fine, clean lines and large windows.

The 465 square meters built are distributed over two floors and a basement, where the finishes in noble materials, the bright rooms and the large windows that connect the interior and exterior to create a single fluid space that fuses the house with the environment stand out. With a swimming pool at the top, you can enjoy a relaxing bath, with views of the Mediterranean. Built in concrete and with a smooth white exterior finish, we combine modernity with energy efficiency and acoustic comfo...(Ask for More Details!)

This villa is designed in a contemporary architectural style, with fine, clean lines and large windows.

The 465 square meters built are distributed over two floors and a basement, where the finishes in noble materials, the bright rooms and the large windows that connect the interior and exterior to create a single fluid space that fuses the house with the environment stand out. With a swimming pool at the top, you can enjoy a relaxing bath, with views of the Mediterranean. Built in concrete and with a smooth white exterior finish, we combine modernity with energy efficiency and acoustic comfort in the interior. Undoubtedly an environmentally friendly house that has used 50% less water in its execution and generated 60% less waste.

To maintain the connection between the house and its surroundings, each villa has a large 2,000 m² garden outside with views of the Mediterranean Sea, which manages to maintain a continuum that begins inside the house and extends to the horizon.

AN EFFECTIVE AND SUSTAINABLE CONSTRUCTION SYSTEM
